PROFESSIONAL SUMMARY

Recent B.E. graduate in Computer Science and Engineering (Artificial Intelligence & Machine Learning) (2026) with strong skills in Python, Machine Learning, LLM-based applications, and Android app development. Hands-on experience building AI/ML models, GenAI-powered applications, RAG pipelines, and data-driven solutions. Passionate about solving real-world problems and eager to contribute and grow in AI, Machine Learning, Data Science, or Software Development roles.

INTERNSHIP EXPERIENCE

AI Engineer Intern — Techvito *Present*

- Building LLM-powered applications with Retrieval-Augmented Generation (RAG) pipelines to ground model responses in domain-specific data.
- Integrating tools and data sources with AI agents using the Model Context Protocol (MCP), and applying prompt engineering to improve output quality.

Android App Development Intern, Generative AI — MindMatrix Technologies Pvt. Ltd *Bengaluru*

- Built an AI-integrated mobile application using Android Studio, Kotlin, Jetpack Compose, MVVM, Room, and Figma — including an Employee Performance Tracker app with analytics features — managing the full development lifecycle from architecture to deployment.
- Developed the “Nirmana” chatbot using Google AI Studio with Gen AI and API integration.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering (AI & ML) *2022 – 2026*
Rajeev Institute of Technology, Hassan *Hassan, India*
CGPA: 7.68 / 10

SKILLS

Languages	Python
Mobile App Development	Android Studio, Jetpack Compose, MVVM Architecture, Room Database, Firebase, Material Design
Machine Learning / AI	Supervised & Unsupervised Learning, CNN, Predictive Modeling, LLMs, RAG (Retrieval-Augmented Generation), MCP (Model Context Protocol)
Visualization & AI Tools	Google AI Studio, Gemini, AI Chatbot Development, Prompt Engineering
Tools & Platforms	GitHub, Visual Studio Code, Android Studio, Postman, AWS Cloud, Figma

CERTIFICATIONS

- Data Science – Infosys
- Statistics – PrepInsta
- Generative AI – PrepInsta
- Full Stack Web Development using Python – EduCADD Think Works

PROJECTS

Eye Controlled Mouse Cursor

- Developed an eye-controlled virtual mouse using computer vision to enable hands-free cursor movement and click operations through real-time eye tracking.
- Implemented facial landmark detection and gaze estimation to improve accessibility for users with physical disabilities.

Tech Stack: Python | OpenCV | MediaPipe | PyAutoGUI | NumPy

Pest Detection Using Image Processing and Deep Learning

- Developed an AI-based pest detection system using image processing and deep learning to identify and classify crop pests.
- Improved detection performance through image preprocessing, CNN models, and data augmentation, achieving 92% classification accuracy.

Tech Stack: Python | TensorFlow | Keras | OpenCV | CNN | NumPy | Pandas

Employee Performance Tracker (GenAI-Powered Android App)

- Developed a GenAI-powered Android application for employee performance tracking, task management, and productivity analytics with an intuitive user interface.
- Integrated AI-driven insights, Firebase services, and real-time dashboards to support data-driven performance evaluation.

Tech Stack: Kotlin | Jetpack Compose | MVVM | Firebase | Gemini API | Android Studio | Room Database | Figma

SOFT SKILLS

Analytical Thinking • Team Collaboration • Time Management • Problem Solving • Communication
